Old Business

Plantation Island Title and Further Documentation of its best Recreational Use, pathway development and so forth

New Business

Closure of Bicycle, Pedestrian, electric bikes and golf carts on private Lot 99 which provides access to the north side of the Boise River and what is known as Bridge #1 on Plantation Island. Tacit agreement the last 30 years provided public access to the greenbelt for the past 30 years on the good will of the adjacent 12-14 residences. Peter Snowden representing the HoA has set about having it closed, barring any access and threatened ACHD with having this access taken off its maps.

Discussion: As the built environment gets larger how should cities operate in terms of plat conditions, which have been installed as part of approval. This instance needs to go to the order/conditions on the part of Garden City's original findings. This could be a misreading of the plat imposing in effect a license agreement for the public right-of-way, now vacated at the HoA's insistence. Should highway districts such as ACHD have jurisdiction in plat conditions? Is there room for re-reading the original plat approval and re-installing the public right-of-way?
